

Contextual Explanation

The Educator Preparation Provider (EPP) achieved a 100% pass rate on Praxis II Content Knowledge licensure assessments for all program completers during the 2024–2025 academic year across both traditional undergraduate and alternate certification pathways. For Elementary and Early Childhood certification areas, candidates completed the Elementary Education Multiple Subjects subtests (5002–5005). A combined total of 15 completers demonstrated strong performance across all content domains, with program mean scores exceeding Louisiana state averages in each area. In alignment with updated Louisiana Department of Education requirements, candidates also completed the Teaching of Reading requirement through Praxis subtest 7002. All candidates successfully met this requirement. Program mean scores for this assessment

are not reported due to limitations in aggregated ETS reporting outputs. For secondary certification areas, candidates completed Praxis assessments aligned to their respective content areas. English Language Arts candidates (N = 11) demonstrated performance aligned with state averages. All other secondary areas had small cohort sizes and are reported in accordance with confidentiality guidelines. In accordance with reporting standards, program means and score ranges are not reported for assessments with fewer than six candidates.

Clarification: The number of candidates (N) reported for each assessment reflects the number of program completers who took that specific test. Because candidates complete different assessments based on certification area, counts across assessments are not additive and may exceed the total number of program completers.
