

TPCP Evaluation of Program

Summary: This survey is sent to teacher candidates after completion of the program to determine their thoughts about the quality of all components of the teacher preparation program. Overall, the results show that our teacher candidates felt the program prepared them with the basic skills needed to perform key teaching tasks. Eighty-five percent of the students responded with Effective/Meets Expectations or Exemplary/Exceeds Expectations to the question: "To what extent do you feel TPCP gave you the basic skills to do the following?" The questions regarding mentor teachers showed that this is an area for improvement with our program. We will use this data to improve and strengthen the training and expectations with our mentor teachers.
